

SUPPLIERS LIST – as of July 15, 2024

COMPANY	ACTIVITY	LOGO	COUNTRY
ACTION COMPOSITES	Development, design and production of carbon composite components. Besides Premium vehicle manufacturers, our customers are also large volume producers and automotive manufacturers in America and Asia. No limit to further growth thanks to production facilities in China & Vietnam, and innovative pioneering technology		Austria
AIREX 3A	Core Materials producer and supplier		Switzerland
AIRTECH	World's largest manufacturer of vacuum bagging & composite tooling materials for prepreg/autoclave, resin infusion & wet lay up processes up to 426°C. Large Scale Additive Manufacturing capabilities along with fiber reinforced resins for low and high temperature 3D Printing		Luxembourg
BASE MATERIALS	Manufacturer of epoxy and polyurethane tooling boards for the manufacture of composite tools and parts.		United Kingdom
BLACKS	Fiber reinforced composite parts		Italie
C6 TOOLING	Tools, aggregates and their purposeful combination for use in CNC machining centers		Germany
CHOMARAT	Textile Reinforcement Producer (Carbon, Glass, Aramid, Natural Fiber)		France
COMEC	Special Machines for Composites, Main Technologies are Towpreg, Prepreg, Filament Winding, ATL and AFP, machines for mass production and R&D applications based upon more than 50 years of experience in machines assembling. Involved in innovative projects for hydrogen		Italy

	regarding towpreg Winding and Aerosol Jet Printing Technologies		
COMPOSITEEDGE	Innovative Solutions in Lightweight Construction		Germany
COMPOTECH	Composite manufacturing and technology company, Offering advanced winding technology alongside composite engineering, design, analysis as well as production. Bringing our customer the full advantages of fibre winding with true, zero-degree axial and 3D fibre placement.		Tchec Republic
CYGNETEXKIMP LIMITED	UK based machine builder for the composites industry, leading supplier of creels, filmers, thermoset and thermoplastic prepreg machines, slitting machines, filament winders, automation and handling equipment, composites recycling machines (DEECOM)		United Kingdom
DIEFFENBACHER	Dieffenbacher is a leading manufacturer of press systems and complete production plants for the composites industry. We offer all technologies such as SMC, LFT-D/GMT, wet molding and the hydraulic press as a core element. The Dieffenbacher digitalization platform EVORIS complements our forward-looking range of services.		Germany
ELANTAS	Elantas is part of the ALTANA Group, a global leader in speciality chemicals. As specialist in formulating Polyurethane, Epoxy and Silicone resins, we are offering a broad assortment of high performance products for a variety of composite application processes eg laminating wet lay up, RTM & Press molding, vacuum bag infusion, pultrusion and filament winding. In addition our portfolio includes structural adhesives and sealants for a rapid bonding and a full range of resins for tools and models such as extruding pastes for large shape, EP/ PU tooling board and liquid resins		Germany
FK GROUP	FKgroup has been a top reference company for analysis, planning and automation for the cutting room since 1961. From Bergamo, heart of "Made in Italy" textile production, to all over the world, FKgroup carries its		Italy

	brand name with the most eminent Italian and International brands in textile production in all its segments, from Fashion to Home Textile, and from Automotive to Composites Fabrics.		
FATTOMONKI CARBON	Prototyping, Simulating		Hungary
GUNNAR	Digital Cutting Machines and Cutting Room Solutions for Composites and Advanced Materials		Switzerland
HAUSCHILD	Producer of centrifugal mixing machines		Germany
HG GRIMME	With our cutting-edge machine developments and high-precision technologies, we are established as a machine manufacturer in the whole world for three		Germany
HÜBERS Verfahrenstechnik Maschinenbau GmbH	Development & manufacturing of Equipment & Machinery for the processing of resins in the manufacturing of Composites (Infusion, RTM..)		Germany
HUFSCHMIED ZERSpanungssysteme	Hufschmied Zerspanungssysteme has over 30 years of experience in the development and production of process-optimizing, material-related tools. Our strength is to advise our customers in their efforts to achieve the best possible manufacturing process and to optimize the processes in partnership with tools such as milling cutters and drills of the highest precision.	HUFSCHMIED ZERSpanungssysteme	Germany
INSTAWERK	CNC-Machining of Components from Prototypes to Series Production , 40+ Post treatments like anodizing , Digital Procurement Channel		Germany
IPCO	Producer of steel belts, Manufacturer of ThermoPress Systems, Manufacturer of Scattering Systems, Manufacturer of Film Casting Systems		Germany
KELTEKS	Design, Development, Production and Sales of Reinforcements made out of technical textiles such as glass fiber, basalt fiber, carbon fiber, natural fiber		Croatia
KÜMPERS COMPOSITES	Leading manufacturer of textile semi-finished products for structural applications in fiber-reinforced composites (FRP) for the automotive, aerospace and wind industries.		Germany

	Manufacturing customized solutions based on carbon, glass and aramid for fiber reinforced plastics for all industries. Advising customers at all stages of the production value chain and join them until the finished product. with comprehensive professional know how and modern technical equipment meeting the highest requirements		
KURIS SPEZIALMASCHINEN	Manufacturer of cutting solution like manual hand cutting machines, automatic spreading machines, automatic cutting machines, CAD programs.		Germany
LANGZAUNER GESELLSCHAFT M.B.H.	Langzauner is the leading expert in the development and production of hydraulic presses, automation solutions, special solutions and turnkey concept solutions in the automotive, aerospace and sport industries as well as the metal and wood industries		Austria
NIPPON ELECTRIC GLASS EUROPE	Fiber glas manufacturing		Germany
PINETTE EMIDCAU INDUSTRIES	Pinette is a independent industrial engineering French SME. It provides standard or customized machines -forming presses, assembly jigs, test benches - within production lines or turnkey plants. Its customers manufactures and technical centers are key playeys in aeronautics, railways, aerospace, automotive, farming, medical, defence & infrastructures. Since 1863, in Chalon sur Saone, Burgundy, France, and its subsidiaries in Italy, Germany, USA, Its 170 engineers, technicians, apprentices make 40K€ revenues, 70% turnover abroad, and dedicate 10% of its revenues to R&D		France
REBSTOCK CONSULTING	Distributing ZUND Switzerland, Fiber & Textile Cutting machines, Robots and Automation Hardware, Cutting, Trimming, Milling & Drilling of Composite Parts		Germany
REICHENBACHER	Manufacturer of first class CNC milling machines. At the site in Dörfles-Esbach near Coburg, 5 axis machining centers are developped and manufactured that have the highest safety standards and are used in aircraft, automotive, ship and rail vehicle		Germany

	<p>construction as well as in the woodworking industry or by manufacturers of components made of aluminium, plastic or composite materials. in the field of additive manufacturing we are breaking new ground with customer-oriented solutions in industrial applications.</p>		
SAERTEX GMBH & CO. KG	<p>with 12 production sites in 5 continents SAERTEX is the global market leader in the manufacture of multiacial fabrics and core materials made of glass and carbon fibers</p>		Germany
SHD COMPOSITES MATERIALS LTD	<p>Prepreg Manufacturer</p>		United Kingdom
SWARCO	<p>Glass Filler Beads</p>		Austria
UNCOUNTABLE	<p>Software Platform Provider for global R&D teams. Uncountable is global organizations' trusted partner whose cloud solution centralizes all R&D Data across the organization, helps reduce new product development timelines and optimize R&D teams' ressources. World leading organizations choose Uncountable to modernize their R&D workflows from disparate, dispersed data sets into an integrated R&D knowledge base, unearth new learnings and vizualization tools, and add predictive capabilities to their R&D toolset</p>		Germany
WICKERT MASCHINENBAU GMBH	<p>The WICKERT WKP S presses are designed for manufacturing mouldings in composite materials. Out of modular standard components, WICKERT produce a wide range of presses, either standard or adapted to he clients individual tasks requirements. The WICKERT product range consists of press systems including automation for RTM, HP-RTM, wet-lay up, prepreg, thermoforming, compression mouldings as well as all related processes. The WICKERT moular systems includes presses with a clamping force from <20 kN to >110.000 kN for a variety of product dimensions and product types. In addition to composite presses, WICKERT also manufactures presses for processing elastomer, powders, plastics and friction materials.</p>		Germany

JEC FORUM DACH 2024

Business Meetings & Conferences

Oct 22-23, 2024 | STUTTGART
GERMANY

WOLFANGEL	Metering, Spraying Systems (Gelcoat/Fiber), RTM, Vacuuminfusion*, Mobile vacuum systems, Resin Handling Equipment, Vacuum Generation Units, Robots & Automation Hardware, Coating & Painting Equipment & Systems For Finished Parts.		Germany
